AMENDMENTS TO THE CLAIMS

Docket No.: 112020.129 US2 (NAN-6)

This listing of the claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

1. (previously presented) An assembly including a substrate and a conductive trace disposed

on the substrate, wherein the trace includes a plurality of unaligned nanotubes for providing

a plurality of conductive pathways along the trace.

2. (previously presented) The assembly of claim 1 wherein the nanotubes include single walled

carbon nanotubes.

3. (previously presented) The assembly of claim 1 wherein the nanotubes include multi-walled

nanotubes.

4. (previously presented) The assembly of claim 1 wherein the nanotubes have different

lengths.

5. (previously presented) The assembly of claim 1 wherein the nanotubes include nanotubes

having a length shorter than the length of the article.

6. (previously presented) An assembly including a substrate and a conductive trace disposed

on the substrate, wherein the trace includes an electrical network of a plurality of unaligned

nanotubes in contact with other nanotubes to provide a plurality of conductive pathways

along the trace.

7. (original) The assembly of claim 6 wherein the nanotubes include single walled carbon

nanotubes.

8. (original) The assembly of claim 6 wherein the nanotubes include multi-walled carbon

nanotubes.

9. (original) The assembly of claim 6 wherein the nanotubes have different lengths.

10. (original) The assembly of claim 6 wherein the nanotubes include nanotubes having a

length shorter than the length of the ribbon.

2

Application No. 10/774682 Docket No.: 112020.129 US2 (NAN-6) Amendment dated April 24, 2006

Reply to Office Action of January 27, 2006

11. (previously presented) An assembly including a substrate and a conductive trace of predefined shape, the conductive trace being over the substrate, the conductive trace including a plurality of unaligned nanotubes for providing a plurality of conductive paths along the extent of the trace.

- 12. (previously presented) An assembly including a substrate, at least one metal electrode, and a conductive trace of predefined shape, the conductive trace being over the substrate, the conductive trace including a plurality of unaligned nanotubes for providing a plurality of conductive paths along the extent of the trace, and the metal electrode being over at least a portion of the conductive trace, the metal electrode being formed by a metallization step.
- 13. (currently amended) A wafer substrate structure having a non-woven fabric of unaligned nanotubes <u>substantially parallel to and</u> covering a major surface of the wafer substrate and wherein the nanotubes of the fabric are arranged in accordance with inherent self-assembly traits of the nanotubes.
- 14. (previously presented) A wafer substrate structure having a non-woven fabric of unaligned nanotubes covering a major surface of the wafer substrate and wherein the fabric is substantially a monolayer of nanotubes.
- 15. (currently amended) A wafer substrate structure having a non-woven fabric of unaligned nanotubes <u>substantially parallel to and</u> covering a major surface of the wafer substrate and wherein the fabric has a controlled density of nanotubes.
